(676764)

TITLE: 4-D imaging and real-time motion redefine ultrasound technology
AUTHOR: Kotelly, George
SOURCE: Vision Systems Design,   v7 n6 p14(4) Jun 2002
ISSN: 1089-3709
HOMEPAGE: http://www.vision-systems-design.com

FILE SEGMENT: Review
RECORD TYPE: Product Analysis
GRADE: Product Analysis, No Rating

REVISION DATE: 20030630

...4D imaging and real-time components are revolutionizing ultrasound
technology by adding the dimension of **time** to the **medical** imaging
world. when 3D images are obtained in real **time** , up to 16 volumes per
second. the ultrasound system continuously scans the region of interest in
3D and concurrently visualizes three orthogonal planes in real **time** . The
technique allows use of various new **medical** evaluation techniques for
diagnosis and therapy planning, in addition to ultrasound-guided less
invasive procedures...

...Motorola, and Wirehound, is a facial recognition system that finds faces
in a field of **view** , searches a face-matching **database** , and delivers a
wireless image in color to phones.
